Scott: drums

No year in pop culture changed the face of music like **1969**. From the Fillmore to Woodstock to Altamont, the musical revolution could be heard in the performances of a virtual army of influential rock icons. **1969** saw the baby boomer generation come of age as the music and creativity of the time set a new standard that is unequaled to this day. **1969** defined a generation that spoke with passion and voiced their emotions through the music of the time.

Today, the band **1969** breathes new life into songs made famous by Jimi Hendrix, Janis Joplin, Jefferson Airplane, Joe Cocker, Cream and so many other stars of the psychedelic era. Seven Chicago area musicians — all veterans of Chicago's music scene — have found what was once important and true can be rekindled in spirit. The members of **1969** discovered a common bond in the music of their youth and a shared passion for keeping it alive. Featuring three lead vocalists and a blistering rhythm section, they're a perfect fit for fests, corporate events or theme parties. **1969**'s exciting stage show & classic music will take you back, as you find yourself dancing & singing along like it's **1969** all over again!
