

# Pocketful Of Songs

**W**ell, this is one of those "exception" songs that came about from me sitting down and consciously "writing" the song. In this case, I purposely decided that I wanted a song for the theme of the album - an album that was a collection of the oldest songs I had written. So the title of a "pocketful" seemed perfect, and the image I always had was of me standing in front of a wall with my pockets turned inside out, and animated music notes begin pouring out! We tried to stick faithfully to this theme many years later as it finally got photographed and documented here.

The song itself was written during the last part of the period where I was interested in the country music style. It goes hand in hand with "Song for a Cowboy" and "Winding Roads" in its country flavor. It's a fun song to play and to sing, and has an easy tune that everyone finds quite "singable".

- John
