Since I discovered EVOLVE I cannot miss it on any of my projects! It sounds amazing, totally impressive fitting each kind of music genre and inspiring me hugely, EVOLVE gives the ultimate and modern feel to all my compositions!

I used EVOLVE excellent instruments and multi from Pop to Metal songs and, of course, on all New-Age and Soundtracks productions. I always got what I was looking for... and, last but not least, the Expanded contents complete and update EVOLVE ceaselessly...

There is no music area that EVOLVE cannot afford, it is the perfect "assistant" in my studio (even if the first one is my girlfriend Ivana :-)
