Mu Technologies

I always was looking for a "human" vocal plug-in to "intelligently" make vocal harmonisation. I missed it till I discovered the only one that "sings" perfectly with my singer... **Mu Voice!**

Finally, I can think musically about back vocals, no more robotic unexciting compromises to build vocal harmonies... Now I can get, in a while, what I need; perfect and superb back vocals on all over the song, totally automated and under perfect song-chords or keyboard controls!

Moreover, my lead solos nevermore will miss my studio overdubbing... now, I can keep studio harmonisations playing live with Mu Voice on stage! Last but not least, sound quality is first-rate!

Mu Voice is absolutely amazing, totally fantastic!

A handwritten signature in black ink, appearing to read 'M. S. Thoria', written in a cursive, flowing style.
