---

Saxophone and Trumpet are some of the most complex acoustic instruments to “move” in a cyber music world, **Mr.Sax T.** and **The Trumpet** by SampleModeling are the only and best citizens in the virtual town of instruments... SampleModeling crossed the way of music-technology to match the sound of human-soul playing: nowadays this is the “essence” of any project to build a “real” virtual instrument!

I will never stop to thank everybody at SampleModeling for their excellent job; now, finally, I can really record Saxophone and Trumpet getting that right feeling and sound I was looking for to improve any of my songs.

Astonishing sound, unequalled playability, richness of details, wonderful expressivity... there is nothing more to ask to these two “real-irtual” instruments ...just load and play them!

A handwritten signature in black ink, reading "M. S. Thovier". The signature is written in a cursive style with a long, sweeping underline.
