### **E.A.T.E.R. Volume 1**

Song List: 1. Entrance, 2. Adjustment, 3. Takeoff, 4. Explore, 5. Return

This is the first installment of the highly anticipated album collection by Mr. Doc aka Mr. Diggs. Mr. Diggs first took on the project as something that would be marketed to the Spa and relaxation industry. Very relaxing and melodic soundscapes that invite mellow interactions. Instead of keeping it just for the spa Diggs decided to put some edgy undertones, and drums in several parts of the album, along with some organic drums like the tabla. This album was recorded live in its entirety in the famed Music Garage Studios where Diggs' studio resides. One reviewer went as far as this:

“Love the lush chords, the truncated cowbell, and the reverb on the drum loop ... all in great contrast to each other creating an effective whole.”

Another reviewer stated:

“Kalimba hotness! And Indian beats?! HAWT!”

And yet another quote

“OOOOOH! Love the Kraftwerk-y opening bit of minimal percussion.”

This is the record (brainchild) that I wanted to make, exactly how I wanted it to turn out, says Diggs. I wanted to make a record that would relax everyone, my mother, my wife, high schoolers, college goers, etc. From age to age. I feel that was accomplished here.

Whats also neat about this project is that there is so much more to come. This is only the first volume, there are a total of 4 volumes in the EATER series. Volumes 3 and 4 will include poets and singers.

More to come on that, for more information go to [www.djmrdoc.com](http://www.djmrdoc.com).
