Attention: Louis Wilson

Thank you for your participation in the Career Day at Martin Luther King Jr. Middle School. The students had a wonderful time and learned a lot in the process. Your participation in the various events has added a wonderful exciting feel and the students have appreciated every minute of it.

These career events are essential in helping these 8th grade students make the connection from school to work. They will be entering high school next year and will need to choose a course of study that is based on a career choice. The exploration opportunity that you and businesses like you give to our students is invaluable. So many students have aspirations of owning their own businesses. Why wait...they can start on the path to becoming entrepreneurs right now. I really like that your company is able to help them see the possibilities. I look forward to working with you again.
